

PYAE SONE AUNG

07557 036765 | psaungmitch25@gmail.com | linkedin.com/in/pyaesoneaung-mitch | github.com/pyaesoneaungmitch

PROFESSIONAL SUMMARY

First Class BSc (Hons) Applied Computing graduate (82.4%) with software development and Odoo eCommerce internship experience. Built full-stack Laravel/MySQL applications and applied AI projects using Python and TensorFlow/Keras; seeking graduate software, AI and technology roles.

WORK EXPERIENCE

BSc (Hons) Applied Computing - First Class (82.4%) | University of Huddersfield Sep 2025- May 2026
Level 3, 4 & 5 Diploma in Computing | NCC Education / University of Greenwich Apr 2022 - Jan 2025

WORK EXPERIENCE

Software Development Intern | Realistic Infotech Group | *Yangon, Myanmar* Jul 2024 - Jan 2025

- Built a full-stack eCommerce platform using PHP, Laravel and MySQL, delivering 14 core user and admin features across product management, authentication, checkout and order-processing workflows.
- Developed a Java (J2SE) Student Registration System with 10+ core workflows, using object-oriented programming and data structures to manage enrolment, student records and administrative operations.

Solution Architect / Functional Consultant Intern | Realistic Infotech Group | *Yangon, Myanmar* Jul 2024 - Jan 2025

- Analyzed and translated 25+ business and functional requirements into Odoo eCommerce configurations, helping align system functionality with stakeholder needs and operational workflows.
- Mapped and validated 12+ business processes across sales, product management and customer workflows, collaborating with technical and functional teams to identify configuration gaps before delivery.

RELATED PROJECTS

WANTED - Roommate Compatibility Platform | Laravel, PHP, MySQL, JavaScript, Bootstrap

- Built a full-stack roommate matching platform using Laravel MVC, PHP, MySQL and Bootstrap, with authentication, profile management, discovery, matching and private messaging features.
- Includes a 0–100 compatibility and AI scoring algorithm using questionnaire responses and lifestyle criteria, storing calculated scores in a relational MySQL database and using them to rank potential matches.
- Conducted real surveys and tested with 8 real users, achieving 80% satisfaction with the compatibility feature.

SketchGuess-AI — AI Drawing Recognition Game | Python, TensorFlow/Keras, Streamlit, NumPy, Pillow

- Trained a Convolutional Neural Network (CNN) using TensorFlow/Keras on Google Quick, Draw! data to classify sketches across 10 object categories including cats, cars, houses, trees and airplanes.
- Built an interactive Streamlit application with a drawable canvas, using NumPy and Pillow for image preprocessing and returning the model's top-3 predictions with confidence scores in real time.
- Created a model-evaluation pipeline including training-history analysis, confusion matrices and sample predictions.

Handwashing Image Classifier — Computer Vision | Python, TensorFlow/Keras, MobileNetV2, Cleanlab, NumPy

- Developed an 8-class image classification model trained on 8,500+ handwashing images, using MobileNetV2 transfer learning as the feature-extraction backbone and Cleanlab to identify mislabeled training samples
- Designed the classification architecture using Global Average Pooling, Dropout, Dense and Batch Normalization layers, achieving approximately 84% validation accuracy after iterative training and model tuning.
- Used TensorFlow/Keras to visualize training behavior, class performance and prediction reliability.

TECHNICAL SKILLS

Languages & Web: Python, Java, PHP, JavaScript, SQL, HTML/CSS | Laravel, Flask, React, Streamlit, Bootstrap

AI/ML: TensorFlow/Keras, scikit-learn, Cleanlab, CNNs, Transfer Learning, MobileNetV2

Tools: MySQL, Git/GitHub, VS Code, Google Colab, XAMPP, AWS

NON PROFESSIONAL ROLES

Vice President & Event Manager, Myanmar Society | University of Huddersfield Sep 2025- May 2026

Academic Representative, Department of Computing | University of Huddersfield Sep 2025- May 2026
