Professional Summary

Final-year Computing undergraduate at the University of Huddersfield with hands-on experience in software development, data analysis, and applied machine learning. Strong foundation in Python, SQL, and object-oriented programming (Java), with practical experience building data-driven web applications and ML models using real-world datasets. Confident in transforming, analyzing, and visualizing data to produce clear insights, and experienced working across the software development lifecycle Proactive learner currently preparing for the AWS Certified Developer – Associate and expanding skills in computer vision and model evaluation through academic and personal projects.

Education

University of Huddersfield <i>Bachelor of Science with Honors in Computing</i> Modules : Data-Driven AI, Software Architecture, Large Scale Software Engineering, Information Architecture	Huddersfield, UK Sep. 2025 – May 2026 (In Progress)
University of Greenwich (NCC Education Platform) <i>Level 3, 4, 5 Diploma in Computing</i>	KMD, Myanmar Apr 2022 – Jan 2025

Experience

Software Development Intern <i>Realistic Infotech Group</i> - Contributed across the full software development lifecycle, from requirements gathering and system design to implementation, testing, and AWS deployment - Designed and developed a Student Registration System using Java (J2SE), applying object-oriented principles and data structures - Built a full-stack eCommerce platform using PHP and Laravel, integrating backend logic, databases, and user-facing features - Worked collaboratively within a team, communicating progress clearly and contributing to shared problem-solving	Jul 2024 – Jan 2025 YGN, Myanmar
Solution Architect / Functional Consultant Intern (Odoo eCommerce) <i>Realistic Infotech Group</i> - Supported analysis of business and functional requirements for Odoo-based eCommerce solutions - Assisted in mapping user needs to system configurations and solution designs - Worked with technical and functional teams to support solution delivery and validation	Mar 2025 – May 2025 YGN, Myanmar

Projects

AI-Based Roommate Matcher <i>PHP, JavaScript, Python, MySQL, Laravel, Flask</i> - Currently developing a full-stack application that uses AI to score and match users based on compatibility criteria - Integrating a Flask-based service with a Laravel backend to process user data - Collaborated with public for both surveys and user testing to improve the system	Nov 2025 – Present
Handwash Image Classification (Computer Vision CNN) <i>Python, TensorFlow, Cleanlab, NumPy, Matplotlib, Seaborn</i> - Built a computer vision CNN model to classify handwash-related images, training on 8,500+ images with a structured preprocessing pipeline - Applied transfer learning using MobileNetV2, refining the model to achieve ~89% accuracy through iterative tuning and evaluation - Used Cleanlab to improve dataset quality by identifying potential label issues and strengthening training reliability - Produced training analytics and visualizations (loss/accuracy trends, model behavior, and insights) to support model improvement and reporting	Oct 2025 – Dec 2025
Home Cleaning Service Web Application <i>PHP, JavaScript, MySQL, Bootstrap</i> - Developed a full-stack web application using with PHP with Bootstrap as the responsive frontend - Implemented backend logic and database schemas using MySQL - Applied structured software design to ensure maintainability and usability	May 2024 – Oct 2024

Technical Skills

Languages: Python, SQL, JavaScript, HTML/CSS, PHP, VB.NET, Java, Frameworks: Laravel, Flask, React Libraries: pandas, TensorFlow, Cleanlab, NumPy, Matplotlib, Seaborn AI/ML: Computer Vision, CNNs, Transfer Learning, Model Evaluation, Data Visualizations Developer Tools: Git, VS Code, Visual Studio, Eclipse, Google Colab, XAMPP	
---	--

Professional Development

- **AWS Certified Developer – Associate** (*In Progress*): Preparing alongside final-year study; focusing on cloud deployment, backend services, and AWS best practices.
- **Machine Learning & AI Skill Development** (*In Progress*): Actively integrating ways to include AI and Data analytics to projects, i.e. Final year dissertation project is integrated Machine Learning and Data Analytical features. Working with Python and its libraries to constantly improve feature selection, model training, and performance evaluation through both coursework and personal projects.

Additional Experiences

Student Representative <i>University of Huddersfield</i>	Sep 2025 – Present <i>Huddersfield, UK</i>
• Represent students especially internationals with language barriers, acting as a liaison between students, academic staff, and university services • Collaborated with other representatives and successfully improved the international student attendance-tracking system, leading to clearer monitoring and better academic support	
Vice President of Burmese Society <i>University of Huddersfield</i>	Sep 2025 – Present <i>Huddersfield, UK</i>
• Planned and ran society events end-to-end from logistics, budgeting and working timelines • Supported Burmese students by being a point of contact, sharing resources and updates, and helping new members feel welcomed and connected to the university community.
